Part No. MJS13KC – 130 watt motor

Part No. MJS16KC – 160 watt motor  
(includes MFA100 wire harness)

Maradyne introduces its Jetstreme I series of shrouded 12" high performance fans. Designed to fit 15-16" wide radiators, the Jetstreme II is ideal for many Honda Civic and other sport compact applications. Available with a standard 130 watt motor that will easily cool any Civic with a turbo mod, they are also available with a 160 watt motor producing over 1300 CFM. The Jetstreme I is slim measuring a skinny 3.23" for the 130 watt and 3.62" for the 160 watt version. It is also available with temperature harness and adjustable thermostat as well. The Jetstreme I motors are sealed to be dust and waterproof to IP68 making them ideal for off road applications as well. The 12" blade also has the concentric ring preventing blade flex and thus maximizing airflow at high RPM. Maradyne will offer later in Spring 2008, a plastic bracket kit that will swivel 90 degrees for easy mounting (Part No. MFA107) pictured below. For 1992 to 2000 Honda Civics we offer a (Part No. MFA106) bracket kit that will work with either standard or automatic transmissions. For more information and dimensional drawings, visit: [www.maradyne.com](http://www.maradyne.com) or contact Maradyne High Performance Fans, 4540 W. 160<sup>th</sup> Street, Cleveland, OH 44135. 1-800-403-7953.
