

FOR IMMEDIATE RELEASE

Maradyne Jetstreme II
Part No. MJS23K – 130 watt motors
Part No. MJS26K – 160 watt motors

Maradyne Jetstreme II w/controls
Part No. MJS23KC – 130 watt motors
Part No. MJS26KC – 160 watt motors
(includes MFA100 wire harness)

Maradyne introduces its Jetstreme II series of shrouded dual 12" high performance fans. Designed to fit 27" wide radiators, the Jetstreme II is ideal for many Camaro, Firebird and GMC truck applications from the 60's and 70's. Available with standard 130 watt motors that will easily cool any small block, they are also available with 160 watt motors producing over 2600 CFM to cool most big block engines. The Jetstreme II is slim measuring a skinny 3.23" for the 130 watt and 3.62" for the 160 watt version. It is also available with temperature harness and adjustable thermostat as well. The Jetstreme II motors are sealed to be dust and waterproof to IP68 making them ideal for off road applications as well. The 12" blade also has the concentric ring preventing blade flex and thus maximizing airflow at high RPM. Maradyne will offer later in Spring 2008, a plastic bracket kit that will swivel 90 degrees for easy mounting (Part No. MFA107) pictured below. For more information and dimensional drawings, visit: www.maradyne.com or contact Maradyne High Performance Fans, 4540 W. 160th Street, Cleveland, OH 44135. 1-800-403-7953.
