**NEW UNIVERSAL HEATER THE STOKER AVAILABLE
FROM MARADYNE HIGH PERFORMANCE FANS**

CLEVELAND, Ohio – Maradyne High Performance Fans® introduces the Stoker™, a new high performance universal heater designed to put out 28,000 BTUs per hour.

The high-quality Stoker features a vented motor and is available with either two 3” outlet hose vents (part #MM-A1090001) or in a Grille Face (part #MM-A1090002) design. It is heavy-duty injection molded and constructed with a durable glass-filled nylon plastic case.

Measuring 6.5” high by 9.5” long by 8.625” deep, the universal Stoker can be mounted on the floor, under dash or to the firewall. All necessary mounting brackets are included.

Maradyne monitors the design and manufacture of its products at each step of the process to deliver superior parts to the industry. All motors are designed for long life, durability and harsh environments, and are performance tested using Maradyne’s in-house air test chamber for quality control.

A range of add-on kits are available for the Stoker heater, including the Stoker defrost kit with two in-dash defrost grilles and chutes (part #MFA128); a universal engine plumbing kit with heater hose, clamps and valves (part #MFA129); and the Stoker duct kit with flex hose and two round under dash mount louvers (part #MFA130).

To learn more about Maradyne’s heater options, visit www.maradyneHP.com.
